

BIOINFORMATICS, BS

Program Director: Joel Benington, Ph.D.

The program in Bioinformatics provides students with the interdisciplinary scientific and mathematical background needed for graduate study in this growing field at the interface of biology, mathematics, and computer science. The core requirements furnish background in each of these areas while later flexibility in the program will allow the student to emphasize one or the other of these subject areas. The major is appropriate to students interested in a research career in bioinformatics, as well as students preparing for careers in medicine and pharmacology, since these fields are increasingly informed by bioinformatics.

Code	Title	Credits

General Education Requirements (https://catalog.sbu.edu/undergraduate/degree-requirements/)		37
Total Credits		120-122

- 1 Six to eight hours selected from: BIO-321, BIO-390, CS-243, CS-332, CHEM-302/CHML-302, CHEM-401/CHML-401, CHEM-470, MATH-241, MATH-431.
- 2 The foreign language must be at the level of 202 or higher. Students not prepared to begin at this level will need to take additional courses in language.

Outlined below are two suggested yearly plans of study: one for students who want a Bioinformatics degree with an emphasis in biology, and one for those seeking a degree with an emphasis in math and computer science.
