HEALTH AND SOCIETY, BS

Program Director: Joel Benington, Ph.D.

The Health and Society majors combine coursework in Biology, Psychology, Sociology, and other disciplines, to give students an interdisciplinary perspective on human health, and the social and psychological ramifications of wellness, disease, and health care. Students completing a Health and Society major explore topics relating to healthcare from the perspective of the human body, the human mind, and human society. The division of electives into three areas ensures that students will have exposure to all three areas.

Health and Society majors who are interested in becoming physicians, and who are not already enrolled in a B.S./M.D. or B.S./D.O. degree program through the Franciscan Health Care Professions program, must apply to and be accepted by a medical school in the traditional manner.

If you have questions about this, be sure to speak with the Director of the Health and Society Program and relevant academic administrators.

Pre-Medical Track In the B.S. Health and Society major

The pre-medical track is specifically designed for students interested in applying to M.D. or D.O. medical programs. To complete this track, students must also take the following courses: CHML-302, PHYS-103/PHYL-103, PHYS-104/PHYL-104. Together with the courses required for completion of the B.S. in Health and Society, these additional

Select three of the following Society Electives:

Courses will fulfill the prerequisite requirements of most medical schools. Students interested in medical school should also work with their academic advisors in selecting Health and Society electives.

Students interested in health professions graduate programs other than medical school should work with their academic advisor to make sure they have completed the prerequisite courses required for their graduate program of interest. This may include courses not required for the Health and Society major itself.
