

NURSING, RN TO BS

Founding Director, RN to B.S. in Nursing Program: Dr. Connie Perkins

The RN to B.S. in Nursing program at St. Bonaventure University is an innovative way for Registered Nurses (RNs) to achieve their goal of becoming baccalaureate prepared. The program features a hybrid approach to upper division education where students will experience both face-to-face and online offerings. Students will build upon essential nursing skills such as leadership, professionalism, collaborative care, and quality care while also learning about themselves as they work to become more emotionally intelligent providers. The faculty of the RN to B.S. in Nursing program also work to introduce technologically advanced concepts to students to build consumers of the future.

The Nursing Program at St. Bonaventure University is accredited by the Commission on Collegiate Nursing Education (<http://www.ccneaccreditation.org> (<https://www.aacnnursing.org/CCNE/>)).

Officially recognized by the U.S. Secretary of Education as a national accreditation agency, the Commission on Collegiate Nursing Education (CCNE) is an autonomous accrediting agency, contributing to the improvement of the public's health. CCNE ensures the quality and integrity of baccalaureate, graduate, and residency programs in nursing.

Acceptance to St. Bonaventure's RN to B.S. in Nursing program requires:

- an unencumbered RN license in the state to which you want your clinical completion hours to apply;
- an associate degree or diploma degree in nursing from a registered and accredited nursing program in New York state, or from an institution nationally accredited by the Accreditation Commission for Education in Nursing (ACEN) or the National League for Nursing Commission for Nursing Education Accreditation (NLN-CNEA);
- that you practiced nursing within the past five years, or that you graduated from an associate degree or diploma nursing program within the past five years.

Program Learning Outcomes:

- Utilize best evidence and person-centered care rooted in compassion to enhance clinical expertise.
- Demonstrate principles of emotional intelligence, integrity, and a sense of ethical responsibility to the discipline of nursing through the practice of personal, professional, and leadership development.
- Explore healthcare technologies and innovation to optimize quality care and safety while considering policy and systems-based practices.
- Advocate for intentional collaboration and care coordination that involves relevant stakeholders in an effort to promote equitable population health outcomes.

Code	Title	Credits
	Nursing Major Requirements	27
	Nutrition Requirement	3
	Nursing Prerequisites	11
	Transfer Credits	27
	General Education Requirements (https://catalog.sbu.edu/undergraduate/degree-requirements/)	37

Liberal Arts	15
Total Credits	120

Most RN-BS in Nursing students qualify to take the university minimum of 45 credits due to transfer credits from previous education. Please note that 60 credits (see plan of study) is the maximum number of credits a student may have to take.

Students should select courses and sequence in close consultation with the academic advisor.
